

Introducing Uber Freight Exchange: Spot

Spot freight, optimized and accelerated with Uber Freight's network and data

Finding spot freight is easier than ever

As the first destination for combined buy-it-now load pricing, bidding and automated tendering, the Uber Freight Exchange platform helps carriers save time, make better and faster decisions, and grow their business.

Optimize your business throughout the year by finding and bidding on the best loads in a single platform. Using our recommendations and advanced capabilities, carriers of all sizes are able to grow their business faster by discovering more loads within an ever-increasing shipper network with Uber Freight.

Get it done with Uber Freight Exchange

Save time throughout the bidding process

Find the best loads for your business with intelligent search, bidding, and upfront pricing. See a load you like? Book it now.

Bid quickly, with confidence

Make better and faster decisions by evaluating loads confidently with upfront load requirements and a search and recommendations experience that's personalized to you.

Grow your business and increase efficiency

Grow your business with access to more loads from Uber Freight's network of leading shippers. Get more consistent spot freight via Dedicated Lanes and recommendations for backhauls and reloads.

“Uber Freight Exchange: Spot allows carriers of all sizes to book competitive loads and manage all their freight on a single platform.

This builds on our work to streamline procurement and fulfillment channels, empowering shippers and carriers to collaborate even more seamlessly.”

—Eric Berdinis, Uber Freight Product Management Director
